

## *Acne*

We are pleased to offer a revolutionary new approach for adult and teen acne sufferers. The FDA has approved the 532 KTP LASER as a safe and effective treatment for acne on the face, chest or back.

### *How does this treatment work?*

The LASER heats the bacteria to kill it, while the cooling tip keeps the skin protected.

### *When will you see results?*

It may take two weeks before the effects are noticed. The number of lesions and severity of break-outs should reduce over the course of treatment and beyond.

### *What can I expect immediately after treatment?*

Immediately following the procedure you may experience some redness and slight swelling. The redness and swelling usually dissipate within 1-3 days. Make-up can be applied to the treated area immediately. It is extremely important to apply a moisturizer with an SPF of at least 30 and avoid sun exposure on a daily basis to prevent sun damage.

### *How many treatments will I need?*

A minimum of 4 treatments done twice a week are required. For severe cases, 8-12 treatments may be needed. Your Body Perfect professional will assess your individual case at your consultation.

### *What is Acne Treatment with Levulan™?*

For more severe acne amino levulonic acid (Levulan™) is applied to the skin prior to your LASER treatment. This shrinks the sebaceous gland while the LASER kills the bacteria, giving long lasting results. There may be more severe after effects, similar to a LASER peel (see handout), which may require 1-5 days 'down time'.

### *Does it hurt?*

At Body Perfect, we use a topical anesthetic applied to the area approximately 15 minutes prior to treatment, this reduces pain and makes the procedure very tolerable. Oral pain and/or anti-anxiety medication may be prescribed.

What are some risks/side effects? (See Risk of LASER hand-out)

- Redness
- Swelling

What are the benefits?

- No down time
- Reduces the severity of future break-outs
- No prolonged drying

What are alternative treatments?

- Medicines (antibiotics, accutane®, retin-A)
- Skin Care Products

Questions

This procedure has been explained to you in this hand-out and by a Body Perfect professional. If you have any other questions about this procedure, you may call Body Perfect at 888-843-2039.
