

Enhanced Skin Rejuvenation

How does it work?

LASER light is absorbed by **pigmented areas** where it is converted to heat, causing breakup in the pigment. With **broken capillaries and spider veins**, the LASER targets the pigment in the blood and collapses the unwanted vein. To **reduce wrinkles and enhance skin tone** the LASER stimulates collagen growth. Your Body Perfect medical professional will analyze your skin condition and help you select the most effective treatment for you.

When will you see results?

Effects are cumulative. After the first treatment you will see improvements of broken capillaries, small facial veins and pigmented areas within a few days. Other improvements such as wrinkle reduction and toning will be more subtle and may take one to three months. With each subsequent treatment, changes accumulate until you have achieved the improvement you desire.

How often can you have it done?

A series of at least 3 treatments, spaced approximately four weeks apart is our standard recommendation. Occasionally, more treatments may be needed for certain individuals or conditions. Periodic occasional maintenance treatments may be prescribed for optimal, lasting results.

Does the treatment hurt?

At Body Perfect, we use a topical anesthetic applied to the area approximately 15 minutes prior to treatment, this reduces pain and makes the procedure very tolerable. Oral pain medication may be prescribed.

What can I expect after the treatment?

Immediately following treatment the skin may be red and/or swollen. Make up can be applied to the treated area immediately. It is extremely important to apply a moisturizer with an SPF of at least 30 and avoid sun exposure on a daily basis to prevent additional sun damage. This is a no 'down-time' procedure.

How long does it take?

This treatment takes approximately 60-90 minutes. Treatments are spaced 4-6 weeks apart.

What are any risks/side effects? (See Possible Risk of LASER hand-out)

- The most common side effect of **Enhanced Skin Rejuvenation** is mild redness and swelling that may last 3-7 days. Antihistamine is offered to all clients prior to this treatment which keeps swelling to a minimum.
- Pigmented spots may darken initially until they flake away in about 7 days
- Hair growth may be impaired.

What are the benefits of Enhanced Skin Rejuvenation?

Eliminating or reducing the following:

- Broken Capillaries
- Facial/ Nasal Veins
- Large Pores
- Flushing
- Wrinkles
- Age Spots
- Freckles
- Rosacea
- Sun Spots
- Pigmentation
- Sagging Skin
- Lines

What are alternative treatments?

- Bleaching creams
- Electrocautery
- Antioxidants
- Prescription medicine
- Moisturizers
- Cryotherapy

Questions

This procedure has been explained to you in this hand-out and by a Body Perfect professional. If you have any other questions about this procedure, you may call Body Perfect at 888-843-2039.
