Rosacea

THE PROCEDURE

The 532nm green light LASER was FDA approved in 2003 for Rosacea and has been very successful in eliminating superficial blood vessels and underlying telangiectasia that cause flushing. This LASER also destroys the bacteria that cause the papules and pustules sometimes associated with Rosacea.

THE RESULTS

You will begin to see results within the first hour. Skin will continue to improve in the following month. Three to six treatments spaced 3-4 weeks apart may be needed to reduce rosacea symptoms. Results are long lasting but may need a touch-up treatment every year or two.

THE PAIN

A topical numbing medicine may be applied to ease the pain and an antihistamine is offered to reduce swelling. This generally controls the discomfort and renders the treatment pain-free. Oral pain relievers and anti-anxiety medications are available if needed.

THE COST

Rosacea treatment cost is \$400 per session.

BEFORE

This client had large vessels across her nose and cheeks.

One LASER treatment shows vast improvement in clearing these unsightly vessels.

AFTER

BEFORE

Severe rosacea in this 48 year old female was made worse by topical steroid use. She had several treatments prior to this discovery.

After discontinuing the steroid cream four LASER treatments cleared her rosacea as well as the large cherry angioma on her upper lip.

you, only better

BEFORE

This 60 year old female had a bright pink glow that she disliked from her rosacea.

After four rosacea treatments she has less of that glaring redness and does not flush as before.

WHAT CAN ROSACEA TREATMENT DO FOR YOU?

Rosacea Treatments help to restore an even skin tone to red, inflamed skin. It decreases facial veins, papules and pustules which, in turn, lessens flushing and helps skin look and feel smoother. With a series of these treatments, your self-confidence is restored and you are truly...
