## Skin Lesions

### THE PROCEDURE

After physician review and determination of the benign skin lesion, the appropriate FDA approved LASER is used to remove pigment, hair and/or elevation.

### THE RESULTS

You may have a dressing over the lesion which may ooze/scab for about 1-7 days. To avoid scarring, DO NOT pick at the area.

### THE PAIN

Pain is minimal with the topical anesthesia during the procedure. Post procedure pain is minimal and usually controlled with OTC medications.

### THE COST

\$100 per lesion per treatment. For multiple lesions price may be given for an area.

**Seborrheic Keratosis**  
This 60 year old male had several large dark benign lesions on his back that he did not like.

After one LASER treatment, the area of these unsightly spots has improved dramatically.

**Nevi**  
A large, benign, flesh colored mole on this female client's temple cause irritation when she combed her hair.

Two LASER treatments later, the area is smooth and combing her hair is no longer a problem.
