## Stretch Marks

# LASER Treatment

body perfect™  
 MEDICAL SPA

## Stretch Marks

### THE PROCEDURE

We use three types of LASERS to address the problems of stretch marks one to break up and destroy the uneven pigment, the second to stimulate collagen thus promoting tightening, and the third to smooth the surface for a more even look and feel.

### THE RESULTS

An evening of pigment, tightening of loose scar-like tissue and a smoother, firmer surface can be seen. This process is done in 6-12 treatments spaced 2-6 weeks apart.

### THE PAIN

A topical numbing medicine may be applied to ease the pain. This generally controls the discomfort and renders the treatment pain-free. Oral pain relievers and anti-anxiety medications are available if needed.

### THE COST

This treatment is priced based on size, severity and other factors. Price will be given individually at consultation.
