Tattoo Removal

THE PROCEDURE

Medical LASERS deliver an intense beam of light to the tattooed area. When ink particles absorb the light from the LASER, they are broken into tiny fragments. These fragments are then expelled from the skin's surface or absorbed through your body's natural cleansing mechanism, which generally takes a few weeks. Most tattoos require multiple treatments over the course of 12-18 months.

THE RESULTS

Significantly lightened or complete removal of the tattoo.

THE PAIN

Tattoo removal can be quite painful during the treatment. Topical as well as oral pain medications are recommended. Anti-anxiety medications may also be given.

THE COST

This treatment is priced based on the size of the tattoo and other factors. Prices start at \$200 per treatment.

www.bodyperfectusa.com

BENEFITS

- No Visible Tattoo
- Free to Wear What Ever You Want
- The Tattoo is Permanently Removed

ALTERNATIVES

- Abrasion
- Surgery
- Live with the Tattoo

RISKS

COMMON

- Redness
- Swelling
- Hyper and Hypo-pigmentation

LESS COMMON

- Blister/Burn
- Infection
- Scarring in the shape of the tattoo
(can be smoothed with Erbium LASER)

BEFORE

Just after the first treatment, this shows skin breakdown.

AFTER

Four weeks later, this shows healing skin with traces of pigment left to work on.

BEFORE

This client had a tattoo on his upper arm.

AFTER

After twelve LASER treatments, the area of the tattoo is barely visible, and the ink is entirely gone.
