

The next generation
of body contouring.

Be Selective.

GET THE BODY YOU WANT WITH VASER® LIPO.

Every body type has areas that are predisposed to fat storage and even with rigorous diet and exercise, those unwanted bulges often persist. Patented VASER® Technology and the advanced LipoSelection® technique now offer a safe alternative for eliminating unwanted fat, revealing a smooth, new shape with fast recovery.

The next generation in body contouring, VASER Lipo uses ultrasonic energy to selectively break apart fat deposits while preserving other important tissues. Whether you need help with a small problem area or a major transformation, VASER Lipo allows your doctor to do his or her very best work.

"I would never have considered traditional liposuction, but VASER Lipo made me finally decide to address those problem areas on my body."

- Caroline (Colorado)

WHAT IS VASER® LIPO? IS IT DIFFERENT THAN TRADITIONAL LIPOSUCTION?

VASER Lipo, also known as LipoSelection, is an advanced body contouring procedure that selectively removes unwanted body fat. An alternative to the harsh techniques of traditional liposuction, VASER Lipo uses state-of-the-art ultrasound technology designed to gently reshape your body. What distinguishes the VASER Lipo procedure is its ability to differentiate targeted fat from other important tissues - such as nerves, blood vessels and connective tissue. Innovative VASER technology breaks up fat while preserving these other important tissues to promote smooth results and rapid healing.

"I had VASER Lipo on Friday and was back to work on Monday."

-Nancy (Wisconsin)

WHERE IS VASER LIPO PERFORMED?

VASER Lipo is performed in a clean or sterile environment. Some options are a doctor's office, an outpatient surgery center or a hospital. The procedure can be performed under local anesthesia (awake), IV sedation or general anesthesia. You and your physician will decide the best type of treatment for you.

WHAT HAPPENS DURING A VASER® LIPO PROCEDURE?

First, the area to be reshaped is filled with a special saline solution that helps numb the site and shrink the blood vessels (to minimize blood loss and reduce bruising). Next, a small probe transmits sound energy (similar to that used for cataract removal from the eye) to break apart fatty tissue on contact while preserving other important tissue. Finally, the liquefied fat is removed through a gentle suction process designed to minimize damage to surrounding tissues.

"I would definitely recommend VASER Lipo for anyone who is not able to achieve the fat reduction they want by diet and exercise alone."

-Chris (Colorado)

IS VASER® LIPO RIGHT FOR ME?

VASER Lipo is for healthy patients who are frustrated by the resistance of certain body areas to diet and exercise and seek a fast, low-pain solution.

Patients who say they would have never considered traditional liposuction are now finding that the VASER Lipo procedure is a gentle alternative for body shaping. Your VASER Lipo physician can assist you with your decision about potential areas for contouring, anticipated results and the recovery process.

“My self-confidence has risen dramatically – there’s just no describing how good it feels to get rid of that one thing you really dislike about your body.”

–Michael (California)
